How to use the translator in the blog

Is pretty much straight forward...

Just select the language which the article is written with the language selector at the bottom of the page, right side. Scroll back to the article again and choose: i.e.. "Translate to en" (usually located at the bottom of every articule, right hand side... En stands for English, Es..Spanish...etc...)

I hope it will helps..

Enjoy the reading..

Thanks

Gonza.
