When A man meets a Woman

How male/female see things....

Male draw lines, perceive shapes, structures.... Woman can appreciate the colors, the sounds of live ..

When sensitive you balance between them , you can paint the whole picture, with its colors and shapes..

Men wish to meet the physical female, thing about their shapes/bodies.... women feel the ideal, the illusions, not a clear face for it but the inspiration suggested.

When sensitive you balance between them, you love what you see and sing all those emotions.
