BackInBlack

Well... weeks has gone...like generations... in expectation.

Security issues fixed for the server... few things really remains..minor details... system keeps going.

Reassurance

Thoughtful mind , computing crack.

and shelterness in life
grabbing the mind with strong hand.

Staying in lines, in disconnection.
Vibrating sounds, system in operation.

Craziness alive, and needs longing.
Deliberate crash.... but story back,.
steadiness.

Thanks

Gonza.
